

AX11 Bedroom Door Set with Primary & Secondary Override

To suit 35mm/44mm/54mm/60mm doors (confirm size when ordering)

Scan for Demo Videos

Application

For rooms where an Emergency Secondary Override is required. The roller ball latch allows the door to be pushed/pulled. Internally the door can be locked for privacy with the bowling ball turn.

Key entry from the outside when the door is locked. Using our Eclipse Ultra Patented Override Cylinder will allow Primary override for staff if the turn is being held.

If Cylinder entry is not possible the Secondary override mechanism can be engaged using our Override Key, accessed behind the slide cover. The Secondary override independently withdraws the deadbolt without the need to overpower the person holding on to the turn. Once the door is unlocked and Primary or Secondary override have been used, the lock can be reset for normal day to day use.
