

P2R Bathroom Door Set Primary Override with Pinch Grips

Scan for Demo Videos

Application

For bathroom doors with Pinch Grip pull handles and privacy turn with indicator. The roller bolt bathroom lock latches the door in place.

The deadbolt is thrown for privacy on the inside, changing the indicator from green to red on the outside. The emergency release key will override and withdraw the deadbolt if necessary.

The staff override key and integrated clutch in the turn allows staff to override resistance from the inside.
